Discussion:

1. School Performance Framework:

- a. Anne points out that we are back in the blue based mostly on status (achievement).
 - b. We had 80.25 points which puts us in the blue category but just barely.
 - c. We walked through a detailed report showing how points were earned in each category.
 - d. This year they averaged 2 years together to determine growth, etc.
 - e. Polaris had the highest achievement scores of any school in the district, likely the state.
 - f. Polaris' growth scores improved. Anne attributes a lot of that to the leveling in math instruction.
 - g. Polaris' students of color are growing at the same rate, or better than, non-students of color.
2. Next meeting we will discuss the parent satisfaction survey that is part of the school performance framework.
