

Science Matters in America

The Fall Semester includes three clubs (13-week session):

Zany Zoology

If your interests are on the WILD side, then this is the club for you! Explore the world of animals, from A to Z. Examine an owl pellet, get up close and personal with insects, make art from a fish, build a home for a toad, and much more. Classify creatures that slither, swim, crawl, and fly. Unleash your curiosity as we journey through the animal kingdom!

Extreme Electricity

Zap! Electrify your interest as we build a working telegraph, experiment with conductors and insulators, make a quiz board, build an electromagnet, and much more. This club takes electricity to the extreme! We'll charge up those electrons and send them spinning around the room. It's zapping science that will give your brain a charge!

Ancient Inventions

Hop aboard the Science Matters Time Machine to travel back in time to inventions of the past. Step into the shoes of an ancient inventor and discover how technology that we still use today came to be! Read time with your own sundial, build a telescope, make paper from scratch, test designs for the first parachute, and much more. Get inspired by the knowledge of the ancients to become an inventor yourself. In this club, discover amazing science throughout history!

Grades: 1-5 | Wednesdays in the Staff Lounge | 3:30-4:30 pm
Fall Session Dates: September 12 – December 12 (13 week session)
Fall Tuition: \$208
Enrollment: 12 minimum

Registration: Online at www.sciencematters.tv or [download and submit this form](#).
